

xAPI Changelog

1.2.2 → 2.1 version changes

Definitions

The term 'Time' now refers to the number of **milliseconds** elapsed since 1 January 1970.

Communication with the xStation API

All servers' addresses have changed. New addresses:

- DEMO server is available under IP address: xapia.x-station.eu, main port: 5124, streaming port: 5125
- REAL server is available under IP address: xapia.x-station.eu, main port: 5112, streaming port: 5113

Both of the servers **require SSL** connection.

Connection rules have also changed, there is no static requirement for interval between each command. For more info see the documentation.

Login credentials

All login-password pairs will be expired on a new server. To obtain new credentials refer to: http://developers.xstore.pro/panel/server_access (login required).

Commands

Definitions:

Green color – field/command added

Black color – field changed

Red color – field/command deleted

[getAllSpreads](#), [getSpreads](#)

Added

[getAllSymbols](#), [getSymbol](#)

SYMBOL_RECORD:

Field name	Type of change	Old type	New type
contractSize	Type change	Floating	Number
timeString	Field added	-	String

precision	Type change	Floating	Number
initialMargin	Type change	Floating	Number
marginHedged	Type change	Floating	Number
marginMaintenance	Type change	Floating	Number
tickSize	Type change	Floating	Number
tickValue	Type change	Floating	Number
quoteId	Field added		Number
currencyProfit	Field added		String

getCalendar

Added

getChartRangeRequest, getChartLastRequest

RATE_INFO_RECORD:

Field name	Type of change	Old type	New type
high	Type change	Number	Floating
low	Type change	Number	Floating
open	Type change	Number	Floating
close	Type change	Number	Floating
ctmString	Field added		String

getCommissionDef

In response:

Field name	Type of change	Old type	New type
showComDef	Field added		Boolean

getNews

NEWS_TOPIC_RECORD:

Field name	Type of change	Old type	New type
timeString	Field added	Number	String
read	Field added	Number	Boolean
title	Field added	Number	String

getSpreads

Added

getTickPrices

- no timestamp in returnData

TICK_RECORD:

Field name	Type of change	Old type	New type
askVolume	Type change	Floating	Number
bidVolume	Type change	Floating	Number
